

APAVISA
nanotech

Originality consists of returning to the origin. Thus, originality means returning, through one's resources, to the simplicity of the early solutions.

Antoni Gaudí

La originalidad consiste en el retorno al origen; así pues, original es aquello que vuelve a la simplicidad de las primeras soluciones.

Antoni Gaudí

Modern architecture does not mean the use of immature new materials; the main thing is to refine materials in a more human direction.

“La arquitectura moderna no significa el uso de nuevos materiales, sino utilizar los materiales existentes en una forma más humana”

CONSEJOS DE COLOCACIÓN / FIXING TIPS

CUIDADOS A SEGUIR DURANTE LA CONSTRUCCIÓN / CARE TO BE TAKEN DURING THE CONSTRUCTION

Es recomendable colocarlo sólo cuando el resto de los trabajos constructivos hayan finalizado.

Cuando los productos porcelánicos son colocados antes de finalizar la construcción hay que proteger la pieza hasta que se ponga en servicio normal de utilización. A pesar de contar nuestros productos con la aplicación de una película protectora tapaporos.

It is advisable to be laid only when the rest of the building works are complete.

When porcelain tiles are placed before the end of the construction, one must take special care to protect the piece until the works are finalized. Therefore, and even though our products have a protective film in order to block the surface micro pores.

CUESTIONES PREVIAS A LA COLOCACIÓN / PRE-FIXING ISSUES

Es importante previamente comprobar si el tono, calibre y calidad son los requeridos, así como la existencia de defectos superficiales visibles.

Elegir las herramientas y útiles adecuados para la colocación de los productos cerámicos.

Mezclar piezas de varias cajas.

It is essential to check if the tone, size and quality meet the required standards in advance, as well as assuring the lack of any visible surface defects.

One must choose the proper tools for laying ceramic products.

Mix pieces from different boxes.

PREPARACIÓN DEL SOPORTE / SUPPORT BASE PREPARATION

El fondo o soporte debe estar estable, seco, nivelado o aplomado con la consistencia adecuada.

Es conveniente la impermeabilización previa del soporte

Es conveniente disponer de soportes rugosos alterando los soportes excesivamente lisos para que éstos sean ligeramente rugosos para garantizar mayor adhesión.

The support base must be stable, dry, flat and it must have the adequate consistency.

The previous waterproofing of the support base is convenient.

It is convenient to use slightly rough support bases, altering any excessively smooth leveling layer, in order to ensure greater adherence.

ELECCIÓN DEL ADHESIVO / ADHESIVE CHOICE

En nuestro caso los productos cerámicos porcelánicos son con absorción de agua Eb <0,5% se aconseja emplear la técnica de colocación en capa fina con el uso de Adhesivos Cementosos tipo C2.

Para formatos superiores a 30x30cm, se recomienda la técnica de colocación de doble encolado.

El material de agarre debe aplicarse con una llana dentada para conseguir una distribución del adhesivo homogénea por toda la superficie de colocación.

In our case, since porcelain tiles have a water absorption level below 0.5% (Eb <0.5%) it is advisable to employ the technique of placing a thin layer of cement adhesive of type C2.

For formats larger than 30x30cm, we recommend the double-layer-adhesive.

The bonding material must be applied with serrated edged comb to achieve a homogeneous adhesive distribution throughout the laying surface.

COLOCACIÓN DE LAS BALDOSAS / TILE INSTALLATION

La manipulación previa ha de realizarse con el máximo cuidado.

No deberá marcarse la superficie para evitar posibles problemas de limpieza de los mismos.

Es conveniente realizar una revisión ocular de las baldosas ya colocadas por si es conveniente corregir algún defecto de colocación.

En pavimentos mayores de 60 cm en alguno de sus lado es conveniente el uso de grapas de colocación para garantizar la planitud de las piezas.

The previous handling of the tiles must be done with utmost care.

The surface shall not be marked to avoid potential cleaning problems.

It is convenient to perform a visual inspection of the already placed tiles, in case the correction of any misplacement is necessary

In large format porcelain pieces (over 60cm of any of its sides) it is convenient to use leveling clips to ensure the flatness of the pieces.

LAS JUNTAS Y REJUNTADOS / JOINTS AND GROUTS

Juntas estructurales: Cada 30-35 m2 en zonas interiores y la mitad en zonas exteriores.

Juntas perimetrales: aíslan la baldosa y al adhesivo de los movimientos de otros elementos estructurales. Deben tener una anchura de 5 a 10 mm.

Juntas de dilatación: permiten las deformaciones por variaciones térmicas e higroscópicas entre baldosas, adhesivo y soporte. Con una anchura mínima de 5 a 8 mm, en paños de 5x5 m2, en interiores y en superficies a partir de paños de 3x3 m2 en exteriores. Estas juntas deben estar bien ejecutadas, esto es, ser flexibles, impermeables, bien adheridas y llegar hasta el soporte base.

Juntas de colocación: son las existentes entre baldosa y baldosa. Antes del rejuntado estas juntas deben estar vacías. Se desaconseja una colocación a junta unida aconsejándose una junta mínima de 2-3 mm.

El material de rejuntado que se utiliza en las juntas de colocación se debe aplicar con una llana de goma.

Structural joints: every 30 to 35 m2, and half as many in outdoor areas.

Perimeter joints: isolate the tile and bonding material from any structural movements. They must have a width of 5 to 10 mm.

Expansion joints: allow deformations due to thermal and hygroscopic variations between tiles between the bonding material and the support base. Designed with a width of 5-8 mm and in sections of 5x5 m2 indoor and sin sections of 3x3 m2 outdoors. These joints must be well executed, this means that they must be flexible, waterproof, well bonded and must reach the base support.

Installation joints: those between tiles. Before grouting these must be empty. It is not recommended to fix any floor without joints, advising a minimum joint of 2-3 mm.

The grout used in installation joints must be applied with a rubber float.

CONSEJOS DE LIMPIEZA Y MANTENIMIENTO / CLEANING AND MAINTENANCE TIPS

LA PRIMERA LIMPIEZA "DESPUÉS DE LA COLOCACIÓN" / THE FIRST CLEANING "AFTER INSTALLATION"

La eliminación completa de los residuos y de la suciedad de la colocación de las propias baldosas. Cuando el material de rejuntado todavía está fresco, eliminar el material sobrante cuidadosa e inmediatamente, utilizando una esponja y agua limpia abundante. Lavado básico o alcalino utilizando detergentes desengrasantes

The complete removal of residues and dirt from the tile placement. While the grout is still wet, to carefully remove any excess material immediately. This can be done using a sponge and plenty of clean water. A wash should be carried out using basic or alkaline degreasing agents.

EL SELLADO DE SUPERFICIES / SEALING SURFACES

Los productos porcelánicos de APAVISA aseguran un producto que es fácil de mantener, no requieren el uso de selladores o ceras.

All porcelain tiles of APAVISA ensure a product which is easy to maintain. APAVISA products do not require the use of sealants or waxes.

EL MANTENIMIENTO REGULAR / REGULAR MAINTENANCE

Se puede emplear para la limpieza diaria detergentes o desengrasantes diluidos en agua caliente, según indicaciones del envase del limpiador. Es importante que el limpiador no tenga base de aceite, grasa animal, o jabón. También es importante que la baldosa reciba un enjuague a fondo con agua limpia después que el proceso de limpieza se haya completado. El ácido Fluorhídrico (HF) y derivados pueden dañar irremediablemente la baldosa.

Pasos generales de limpieza

- Retirar cualquier residuo, barriendo con una escoba de cerdas suaves o pasar la aspiradora.
- Limpiar los derrames líquidos tan pronto como sea posible.
- Aplicar la cantidad y dilución del limpiador recomendadas para la baldosa.
- Para baldosas sin pulir, frotar con una esponja de nylon o un cepillo de cerdas suaves. Para baldosas pulidas, limpie con un trapo no abrasivo o un paño .
- Retirar la solución de limpieza sucia y el agua con una aspiradora o un trapo. Enjuague la pieza con agua limpia y retire de nuevo con una aspiradora, fregona, o una toalla.

Durante su uso, la limpieza de la baldosa debe hacerse de forma similar a la limpieza de cristales.

En caso de manchas resistentes, es aconsejable usar detergentes específicos

For daily cleaning, one can use detergents or degreasing products diluted in warm water, following each product's instructions. It is important that the cleaner does not have oil, animal fat, or soap base. It is also important that the tile receives a thorough rinsing with clean water after the cleaning process is complete. Hydrofluoric acid (HF) and derivatives can irreparably damage the tile.

General steps for regular cleaning:

- Remove any waste from the tile, sweeping with a soft bristle broom or vacuuming.
- Clean up liquid spills as soon as possible with lukewarm water.
- Apply the recommended amount and dilution of the cleaner for the tile.
- For unpolished tiles, scrub with a nylon sponge or soft bristle brush. For polished tiles, clean with a nonabrasive cloth.
- Remove the dirty cleaning solution and water with a vacuum cleaner or cloth. Rinse the porcelain tile with clean water and remove again with a vacuum cleaner, mop or towel.

During use, the cleaning of the tiles should be similar to window cleaning.

In case of resistant stains, it is advisable to use specific detergents .

UN CASO ESPECIAL: BALDOSAS CON EFECTOS METÁLICOS / A SPECIAL CASE: TILES WITH METALLIC EFFECTS

- Se puede usar cualquier producto no agresivo y con PH neutro.
- Se recomienda el uso de productos con base amoniacal (NH₃) en concentración rebajada.
- No se pueden usar productos agresivos químicamente.
- No se puede usar productos con ácido clorhídrico (HCl).
- El ácido cítrico y otros productos alimentarios ácidos dejarán mancha si se les deja actuar mucho tiempo sobre la baldosa.
- No está recomendado el uso de productos en polvo de acción abrasiva.

- You can use any non-aggressive and neutral pH product.
- We recommend the use of ammonia-based products (NH₃) diluted in water.
- You cannot use chemically aggressive products.
- You cannot use products with hydrochloric acid (HCl).
- Citric acid and other acidic food products leave stains if left too long to act on the tile.
- The use of powder products of abrasive action is not recommended.
